

Publish your research in one of our flagship journals

“We will continue to encourage our researchers and graduate students to submit top quality research works to IOP Journals”

PROFESSOR M X PAN AND PROFESSOR W H WANG,
INSTITUTE OF PHYSICS, CHINESE ACADEMY OF SCIENCES

www.iop.org/journals

Institute of **Physics** PUBLISHING

Make IOP your first choice for international research

Our flagship journals offer you the perfect forum for reaching your peers.

Read recent papers from Chinese authors

A computer-assisted verification of hyperchaos in the Saito hysteresis chaos generator

J. Phys. A: Math. Gen. 2006 **39** 9139–9150

Qingdu Li and Xiao-Song Yang, *Chongqing University of Posts and Telecomm and Huazhong University of Science and Technology*

Quantum theory of two-photon wavepacket interference in a beamsplitter

J. Phys. B: At. Mol. Opt. Phys. 2006 **39** R293–R324

Kaige Wang, *Beijing Normal University*

Broadband left-handed materials made of thin soft ferromagnetic films with in-plane uniaxial anisotropy

J. Phys.: Condens. Matter 2006 **18** 6421–6428

Jiangwei Chen, Dongming Tang, Baoshan Zhang, Yi Yang, Mu Lu and Huaixian Lu, *Nanjing University and Nanjing Artillery Academy, Nanjing*

Synthesis and magnetotransport properties of nanometric spin valve arrays fabricated by electrodeposition

J. Phys. D: Appl. Phys. 2005 **38** 3841–3844

Hui-xin Wang, Yu-Cheng Wu, Li-De Zhang, Guang-hai Li, Jun-Xi Zhang, Ming Wang and Zhi-Gang Li
Institute of Solid State Physics, Chinese Academy of Sciences - Hefei

Dirac sea contribution in relativistic random phase approximation

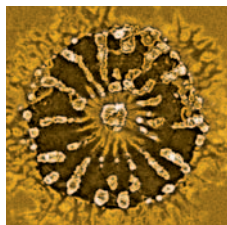

J. Phys. G: Nucl. Part. Phys. 2006 **32** 1269–1277

Shi-Shu Wu, Hai-Xia Zhang and Yu-Jie Yao, *Jilin University and Chinese Academy of Sciences, Beijing*

Growth and photoluminescence properties of PbS nanocubes

Nanotechnology 2006 **17** 3280–3287

Huaqiang Cao, Guozhi Wang, Sichun Zhang, Xinrong Zhang, *Tsinghua University*

SEM image showing the surface morphology of a ferrocene-treated silica layer after heating to $\sim 800^\circ\text{C}$ in flowing argon **Zhengjun Zhang et al** 2003 *Journal of Physics: Condensed Matter* **15** L505-510

Dr H X Wang, Chinese Academy of Sciences - Hefei

*“I’d just like to say that *J. Phys. D: Appl. Phys.* and *Nanotechnology* are high quality journals and we will submit more papers to IOP journals in the future.”*

Professor X S Yang, Huazhong University of Science and Technology

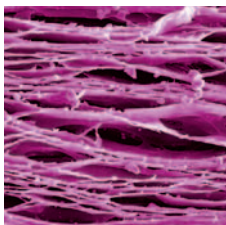

*“*J. Phys. A* is a very prestigious journal; I like to submit our best works to it.”*

Professor H Q Cao, Tsinghua University

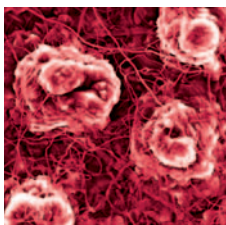

*“*Nanotechnology* is a very prestigious journal for us to submit our best works. I indeed like it.”*

TEM image showing the polymer interlayer between silver nanoparticle and nanotube wall **Chao Gao et al** 2006 *Nanotechnology* **17** 2882–2890

Scanning electron micrograph of a cross section of a ferroelectric film **Xunlin Qiu et al** 2005 *Journal of Physics D: Applied Physics* **38** 649–654

High-magnification SEM image of a ferrocene-treated silica layer after heating in flowing argon to ~1000 °C and exposure to methane for ~10 min **Zhengjun Zhang et al** 2003 *Journal of Physics: Condensed Matter* **15** L505–510

Benefits to authors

Publishing your work with IOP offers you:

Opportunities for citation

These journals have a solid citation record with 2005 ISI® Impact Factors of 1.566–2.173. You can receive maximum visibility and citation opportunities for your work thanks to services such as free online access to articles for 30 days from web publication. Your article could also be chosen to appear in IOP Select, a free service which showcases the very best research published by IOP.

Online functionality

Use our web-based submission facility that is simple to navigate and will send you quick confirmation that we have received your article. You can also follow the status of your submission using the online tracking service.

Quality assurance

To ensure your work is produced to the highest standards all submissions are rigorously peer reviewed by independent referees. All published articles are professionally typeset and proof read.

Fast publication

The median receipt-to-web publication time is just 128 days for papers. IOP is constantly developing the publication service offered to authors and as a result publication times are improving every year.

International visibility

Researchers in over 4000 institutions, in more than 180 countries, regularly visit our website and full-text downloads for all IOP journals are increasing every year. This, together with the promotion of IOP journals at international conferences, ensures that your work reaches a global audience.

Professor K G Wang, Beijing Normal University

“J. Phys. B is a high quality journal and we will submit more high quality papers to it in the future.”

Professor H X Lu and Dr J W Chen, Nanjing University

“JPCM is a very prestigious journal for us to submit our best works.”

Professor S S Wu, Dr H X Zhang and Dr Y J Yao, Jilin University

“We are very glad that our paper has been given a high quality rating. We do appreciate greatly the editor’s effort to raise the quality of published papers and select high quality papers to publish. We would like to submit more of our high quality papers to J. Phys. G.”

How to publish with IOP

You can submit your article in one of the following ways:

- online at authors.iop.org/submit
- e-mail files as attachments to mingfang.lu@iop.org and iopchina@aphy.iphy.ac.cn

Detailed information on how to prepare and submit an article for publication can be found on our website at www.iop.org/journals/nfa.

For further information on titles published by IOP:

Visit our website at www.iop.org/journals or e-mail Professor Mingfang Lu (IOP Beijing Office) at mingfang.lu@iop.org or telephone +86 (0)10 8264 9679
